

Midas Gold Idaho, Inc. currently has an opportunity available for an **Environmental Data Analyst** in our Donnelly, ID office. The successful candidate will have one to five years of professional experience and a strong background in environmental data management and analysis. Proficiency of pertinent software identified below is strongly desired.

Key Responsibilities

- Develop and utilize data validation tools in Excel, Access and SQL to identify data quality issues
- Collect and configure large datasets to meet project specifications
- Perform and coordinate quality analysis of data before placement into database
- Provide technical support to field sampling teams and act as a liaison between the project staff, analytical laboratory, data validator and GIS analysts
- Provide reporting support by generating and formatting tables, charts, or graphs
- Research state and federal regulations necessary to manage action levels or clean-up criteria

Skills / Qualifications

- A Bachelor's degree in environmental science, geology, chemistry, computer science, or another relevant field
- 1 - 5 yrs. experience in the environmental field with emphasis on environmental data management
- Experience with enterprise database software: EarthSoft EQuIS, MS SQL Server, MS Access, and ArcGIS suite
- In-depth knowledge using MS Excel to manipulate and organize data sets for import into a database (EarthSoft EQuIS) and for final reporting
- Strong attention to detail with excellent analytical, judgment and problem-solving capabilities
- Highly initiative, superior interpersonal skills, and ability to work with minimal supervision and to manage multiple tasks simultaneously
- Experience with automating tasks using VBA, Python, or other data intensive languages a plus
- Perform database queries and generate reports and output tables as needed
- Be familiar with all the different types of environmental sample analyses, including EPA analytical methods
- Experience in the planning, design and implementation of mobile applications for field data collection a plus
- Support field investigations and data collection/field sampling activities as needed
- Must hold a valid driver's license and have a satisfactory driving record in accordance with the Company's driving (MVR) policy

Company Overview

Midas Gold owns the world class Stibnite Gold Project, located in a historic mining district in central Idaho. In 2014, an independent PFS demonstrated potential for a large-scale, long-life, low-cost open pit gold mine that stands out from its peers. The Company filed its Plan of Restoration and Operations in September 2016 which has launched the formal permitting process for mine development. Well-funded and with a multi-million ounce high-grade open-pit gold reserve, important antimony credits and significant room for further growth, the Stibnite Gold Project is one of North America's premier development stories.
