

STIBNITE GOLD PROJECT: GOOD FOR IDAHO, GOOD FOR THE ENVIRONMENT

We are committed to the restoration of the historical Stibnite Mining District and the East Fork of the South Fork of the Salmon River.

We have the opportunity to take an area damaged by 100 years of mining activity and improve water quality, wildlife ecosystems, fish habitat and vegetation, while also bringing new jobs to the community and helping grow Idaho's economy.

MIDAS GOLD IDAHO IS:

Committed to establishing a new era of mining in Idaho by bringing responsible, 21st Century mining operations to Stibnite.

Committed to creating good, family-wage jobs, while hiring and purchasing locally, whenever possible, so the economic benefits of the project reach all corners of Idaho.

Committed to being transparent about our plans, goals and daily operations, so we can earn the trust of our neighbors and the respect of the community.

Mining and the Environment Can Work Together

OUR RESTORATION WORK BEGINS TODAY

The historical Stibnite Mining District, abandoned after decades of mining activity, is in need of restoration. Before our project begins, we are working to improve the area:

- **55,000+ trees** planted on-site
- **33 acres** of land reclaimed
- **4,000 lbs.** of waste recycled
- **\$350,000** to improve road conditions and reduce sediment runoff

USING RESPONSIBLE MINING TO REWRITE THE LEGACY OF THE PAST

Through mining, the Stibnite Gold Project will improve the water quality, landscape, fisheries and natural habitat of the area through economic redevelopment. Midas Gold Idaho will put up funds before the project starts to guarantee restoration efforts.

- Reconnect fish migration to the upper stretches of the river for the first time in 80 years
- Restore miles of potential habitat for anadromous fish
- Clean up 10.5 millions tons of waste rock and tailings abandoned on site
- Make improvements to both water quality and salmon and steelhead habitat

WORKING FOR A BETTER FUTURE

Midas Gold Idaho is a responsible corporate citizen and community partner. We have committed to:

- **Partner with communities** to establish the Stibnite Foundation to ensure the communities of the region prosper
- **Work with Idahoans** to make training and hiring local employees and businesses a priority
- **Provide high-paying jobs** to support families and a vibrant and diverse local economy
- Inspired by others in Idaho, we made a commitment to **reduce light pollution** at the work site

**THE STIBNITE GOLD PROJECT IS GOOD FOR
STIBNITE AND GOOD FOR THE ENVIRONMENT.**
